***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach that the handle has a through hole for holding a stopper rod to fix a base of the resilient pin inside the handle as set forth in claim 1.

Regarding claim 1, Chu (2004/0068874) teaches a pocket knife with a lock design including a handle, a chamber, a blade, a safety lock, and a resilient pin. Chu also teaches that the handle includes a first half and a second half and the chamber is defined by the space between the first half and the second half. Chu also teaches that the blade is pivotally receivable in the handle and has a shoulder at the end of the cutting edge and a guiding edge on the lateral side of the shoulder adjacent to the cutting edge. Chu also teaches a driving edge which is located on the other side far away from cutting edge and perpendicular to the axis of the blade and a pin catch on the side wall of driving edge. Chu also teaches that the safety lock is secured inside the chamber with one end fixed inside the handle and the safety lock has a push plate with a raised head for engaging the shoulder at the end of the blade to move the blade into open position. Chu also teaches that the resilient pin is secured in the chamber of the handle with one end fixed on the handle and the other end pressed against the shoulder of the blade. However, Chu fails to teach the handle has a through hole for holding a stopper rod to fix a base of the resilient pin inside the handle as set forth in claim 1.

The above prior art by itself or in combination with the other prior art cited fails to teach the claimed invention set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Due to amendments to the claims and the specification, the objections to the drawings, claims, and specification under 37 CFR 1.72 and the rejections under 35 U.S.C. 112, first and second paragraphs, are withdrawn.

Claims 2, 5-7, and 11-16 have been cancelled.
